88 pts. Wine Advocate, 8.31.09, #184

# Agricola Querciabella

In addition to being 100% Organic, Querciabella practices biodynamic viticultural techniques, refraining from the use of any chemical and artificial products such as pesticides, herbicides and fungicides.

In 1988 Querciabella began the journey of 'gentle farming' practices to help maintain the natural balance that our planet requires for a sustainable future; to help preserve the Tuscan *terroir*, and to protect the honeybee habitats. **Querciabella cultivates more biodynamic acres than any other winery in Italy**, and now officially states *biodynamic viticulture* on the new labels for Camartina, Palafreno and Batàr.

For more information about Querciabella and their initiatives to encourage biodynamic farming, go to:
